

Shrishail Bidave

Software Engineer | Java · Node.js · Scalable Systems · AI Integrations | 2026 Graduate

+91-9405694928 | shrishailbidave045@gmail.com | [LinkedIn](#) | [GitHub](#) | Solapur, Maharashtra — India

EXPERIENCE

Software Engineering Intern · Two Elephants Technologies LLP 2024 – Present

- Shipped 3+ product features collaborating across design, backend, and QA — improved UI responsiveness and reduced user-reported bugs by ~40% through systematic debugging, unit testing, and performance fixes; participated in peer code reviews to maintain code quality.
- Contributed to Agile sprints, daily standups, and sprint retrospectives; proposed a UX improvement in brainstorming sessions that was later adopted in production and shaped 2 major product roadmap decisions.
- Diagnosed and resolved a critical authentication edge case that was blocking ~15% of new user sign-ups.

Full-Stack Apprentice · Manasvi Technology Jan 2026 – Mar 2026

- Built a full-stack SaaS platform end-to-end: role-based authentication (JWT), search, admin dashboards, and a responsive UI using React.js, Shadcn UI, and CSS — delivered within a 3-month timeline.
- Owned the SQL/NoSQL database schema design and API layer using Node.js and Express.js; wrote optimized SQL queries for reporting and search features; implemented input validation and error handling for production stability.

PROJECTS

VidGen — AI Video Generation Platform | *Next.js · Convex · Inngest · Clerk · Cloudinary · PayPal*

- Engineered an end-to-end AI video pipeline: user script → Google Text-to-Speech → MP3 (Cloudinary) → automated video rendering (Remotion) — capable of producing production-ready videos with zero manual intervention.
- Implemented async background job processing via Inngest and Clerk authentication; integrated PayPal for monetization — full SaaS architecture from auth to payments.
- Designed for reliability and scale: decoupled rendering pipeline handles concurrent video generation jobs without blocking the main API; architected for fault-tolerance with async retry logic via Inngest.

CertiFlex — Blockchain Certificate Verification | *Solidity · Polygon · HTML · CSS · JavaScript*

- Built a tamper-proof digital certificate platform on Polygon: institutions mint certificates as on-chain records via Solidity smart contracts; verifiers confirm authenticity instantly via unique hash lookup — eliminating forgery without a central authority.
- Implemented certificate ID validation with O(1) on-chain lookup, ensuring instant verification even at scale across multiple institutions.

FluentFriends — Real-Time Language Exchange Platform | *React.js · Node.js · Express.js · MongoDB · Stream API · WebSockets*

- Built a real-time language learning platform supporting 1-on-1 and group video calls, screen sharing, and session recording — powered by Stream API for production-grade video infrastructure.
- Implemented JWT authentication, protected REST APIs, and WebSocket-based live messaging with typing indicators and emoji reactions; designed MongoDB schema for user sessions and conversation history.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, SQL, Solidity, Python (familiar)

Frontend: React.js, Next.js, Tailwind CSS, Shadcn UI, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, WebSockets, Inngest (background jobs)

Databases: PostgreSQL, MySQL, MongoDB, Firestore, Convex

AI / Cloud: Google Text-to-Speech, Cloudinary, Clerk, Remotion, LLM API integration

Blockchain: Solidity, Polygon, Ethereum, Smart Contracts

DevOps / Tools: Git, GitHub, Postman, Vercel, Docker (learning), CI/CD (GitHub Actions), JUnit (unit testing), Agile/Scrum

EDUCATION

B.Tech — Computer Science & Engineering · N K Orchid College of Engineering and Technology, Solapur 2022 – 2026
CGPA: 7.89 / 10.0

ACHIEVEMENTS & OPEN SOURCE

- 1st Runner-up, Eminence Softech Hackathon — built an AI-powered farmer product marketplace under 24 hours.
- National Finalist, AVISHKAR 2.0 — national-level hackathon organized by AITM College, Andhra Pradesh.
- Aakruti 2023 (Dassault Systèmes) — built student data management software and a 3D EV charging station prototype; presented to industry judges.
- Solved 150+ DSA problems on LeetCode and GeeksforGeeks in Java (actively targeting 300+).

CERTIFICATIONS

- ESD Program — Zensar Technologies
- Java Programming — Giri's TechHub
- Database Management Systems — NPTEL
